4 Theory & Methods

5 Requirements

5.1 Overall Requirements Specification

5.2 Selected Detailed Requirements

5.2.1 Functional & Non-Functional Requirements

5.2.2 The Physical Setup (The Brewery Machine)

5.2.3 The Simulator

The group is going to use the simulator software to test the software during the development cycle. It is important to note that the simulator is not a replacement of the machine since there is only so much randomness and correctness you can get out of a simulator. It is still very important to have the simulator, when making prototypes and performing multiple tests on it, so the group doesn't push any regressions to the production system(the beer machine).

5.3 Use Cases

5.3.1 Actor List

5.3.2 Detailed Use Cases
